Education

Purdue University

Bachelor of Science in Computer Engineering

Aug 2021 – Dec 2025

GPA:3.68/4.00

Butler University

Bachelor of Arts in Economics

Aug 2021 – Dec 2025

GPA:3.97/4.00

Certifications

AWS Cloud Practitioner

September 2026

AWS Solutions Architect Associate

Expected November 2026

Experience

Acuity Insurance

May 2024 – August 2025

Software Engineer Intern

Sheboygan, Wisconsin

- Enhanced next-generation web-based claims application by refining and validating UI fields, helping reduce user input errors and streamline adjuster workflows.
- Built backend services to support mainframe migration, enabling modernization of legacy claims processes and improving long-term maintainability.
- Diagnosed and resolved an issue with multiple database connections being opened, improving application stability and reducing risk of connection exhaustion in production.
- Used Git, DB2, Bruno, and Java daily in an agile environment to develop, test, and debug features for users.
- Improved service security by implementing checks so gateway calls are only processed by trusted applications.

Technical Skills

Languages: Java, C++, C. Python, HTML/CSS, JavaScript, SQL

Technologies/Frameworks: Git, Bruno, JUnit, Mockito, React, DB2, Maven

Relevant Coursework

- Data Structures and Algorithms
- Computer Architecture
- Artificial Intelligence
- Database Management Systems
- Ethical Hacking
- Computer Networks
- Operating Systems
- Microprocessor Systems and Interfacing
- Engineering Research

Projects

Wildfire Mapping Drone | *Java, React*

May 2025

- Designed and developed a drone-based wildfire mapping system using thermal imaging concepts to support real-time environmental monitoring and emergency response
- Integrated hardware and software components while evaluating future improvements such as GPS, Thermal camera, and autonomous flight capabilities.

Social Media Application | *Java*

April 2024

- Developed a console-based social media application with user sign-up, login, profile editing, posts, following, notifications, and file-based data storage.
- Implemented object-oriented design principles including templates, operator overloading, exception handling, and dynamic list management.

Leadership / Extracurricular

Student Orientation Coordinator

August 2022- Oct 2025

Guide, Coordinator

Butler University

- Coordinated multi-day New Student Orientation programming for incoming first-year students, aligning schedules, sessions, and events across campus partners.
- Led a team of 190 Student Orientation Guides, managing communication, shift scheduling, and training to ensure consistent, high-quality support for new students
- Oversaw logistics for large-scale orientation events, including room assignments, check-ins, and crowd flow, helping thousands of attendees navigate campus smoothly.

Club Golf

Aug 2023- May 2025

President

Butler University

- Restructured Butler Club Golf's financial and operational model after inheriting a negative budget balance and unsustainable structure.
- Coordinated tournament signups and team travel logistics, handling communication with players, courses, and club sports staff.
- Managed club finances including budgeting, dues collection, and expense tracking.
